

Unity RAW 5 FB4

PRODUCT SPECIFICATION SHEET

The Unity RAW 5 FB4 is a 5-watt full-colour RGB diode-based laser projector with a professional FB4 control interface and features.

It is designed for those who want an economically friendly laser show system that has the power to produce beautiful aerial beam effects and high-resolution laser graphics, logos and text.

This RAW laser projector is suitable for semi-professionals and hobbyists and can be used in medium-sized clubs and venues.

With the Unity RAW FB4 lasers, you get more than just a laser projector. Our FB4 hardware integration allows for versatile control options, whether from a lighting console, PC, or in stand-alone "auto" mode. Moreover, these lasers support all major lighting protocols, making them a seamless fit into any advanced multimedia show workflow.
